

This guide shows the Marketing and Proposals team where Claude fits real work — from drafting pursuit content to building on-brand decks, dashboards and designs. Find the workflow that matches your task, see which Claude tool powers it, then watch a short tutorial to go deeper.

🔧 MARKETING WORKFLOWS

Draft & tailor pursuit content

Write and tighten proposal narratives, project descriptions and resumes. Keep a Project loaded with the RFP and past wins so every draft starts in context.

CHAT + PROJECTS · *proposals, SOQs, interview prep*

Stay on brand automatically

Our blach-branding and voice skills apply Gotham, brand colors and Blach's voice to any deliverable — no manual formatting.

SKILLS · *decks, one-pagers, templated docs*

Research before you pitch

Brief yourself on a client, market or competitor in minutes — summaries, talking points and smart questions to ask.

CHAT + WEB SEARCH · *client and competitor intel*

Connect your marketing sources

Securely link the apps we already use so Claude works from real assets and live data instead of copies.

CONNECTORS · *Egnyte, Box, Monday.com, M365*

Build live assets & dashboards

Turn raw numbers into interactive dashboards, charts and polished one-pagers you can refine and export.

ARTIFACTS · *BD dashboards, data one-pagers*

Design without a designer

Describe a landing page, pitch deck or layout and watch Claude build it — then refine it just by chatting.

CLAUDE DESIGN · *concepts, layouts, prototypes*

Run repeatable workflows

Package a multi-step job and let Claude run the whole sequence across your files on its own.

COWORK · *proposal assembly, recurring recaps*

Start with one real task

Pick a live pursuit and ask Claude to draft a single section or format one slide. Small wins build the habit faster than trying to automate everything at once.
