

Claude is the artificial intelligence (AI) assistant we are rolling out across Blach. Think of it as one platform with a handful of tools — each suited to a different kind of work. Start a conversation in **Chat**, then reach for the right tool as your task grows. Here is what each one does and when to use it.

THE TOOLKIT

Claude (Chat)

The everyday assistant. Ask questions, draft and edit writing, summarize long documents or analyze information through a simple conversation.

USE IT WHEN you need a fast first draft, a quick summary or a clear answer

Projects

A dedicated workspace that holds your instructions and reference files so every chat starts with the right context.

USE IT WHEN you do recurring work like proposals and want Claude primed every time

Skills

Reusable instructions that teach Claude to do a task the same way each time — like our Blach branding skill.

USE IT WHEN you want on-brand, consistent output without re-explaining the rules

Connectors

Secure links between Claude and the apps we already use, such as Egnyte, Box, Monday.com and Microsoft 365.

USE IT WHEN you want Claude to pull from or work with company files and tools

Artifacts

Editable documents, slides, spreadsheets and visuals that build right beside your chat.

USE IT WHEN you are creating a deliverable you will refine, reuse and download

Cowork

A desktop app where Claude carries out multi-step tasks on its own across your files and connected apps.

USE IT WHEN a job has several steps and you want Claude to run the whole sequence

Claude Code

An agentic tool for building and automating — from simple scripts to working tools, sites and apps. No coding background required.

USE IT WHEN you want to automate a workflow or build a small custom tool

New here? Start simple

Open Chat and ask Claude to help with a real task you have today — a summary, an email or a first draft. Add Projects, Skills and Connectors as your work grows.
